

### Installing VM Horizon Client for Students for Windows

1. Download the latest [VM Horizon Client](https://customerconnect.omnissa.com/downloads/info/slug/desktop_end_user_computing/vmware_horizon_clients/horizon_8) at URL:  
[https://customerconnect.omnissa.com/downloads/info/slug/desktop\\_end\\_user\\_computing/vmware\\_horizon\\_clients/horizon\\_8](https://customerconnect.omnissa.com/downloads/info/slug/desktop_end_user_computing/vmware_horizon_clients/horizon_8)
2. Under VMware Horizon Client for Windows  
Click **Go To Downloads**

3. Click **Download Now**

4. Depending on the browser Click **Run**

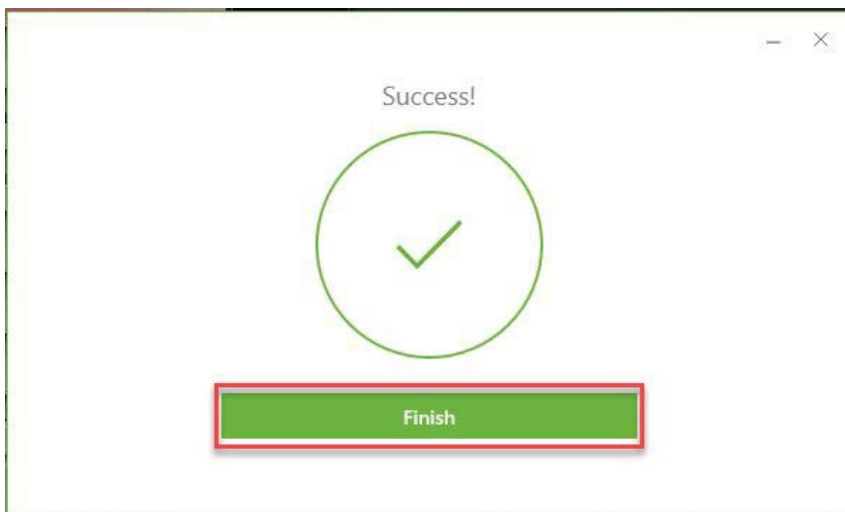

5. Click **Yes**
6. Click **Agree & Install**

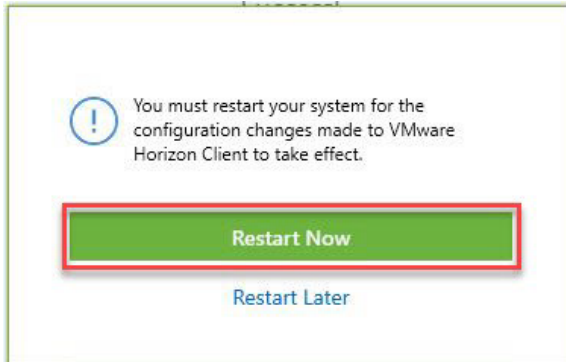

7. Click **Finish**

8. Click **Restart Now** to reboot the system

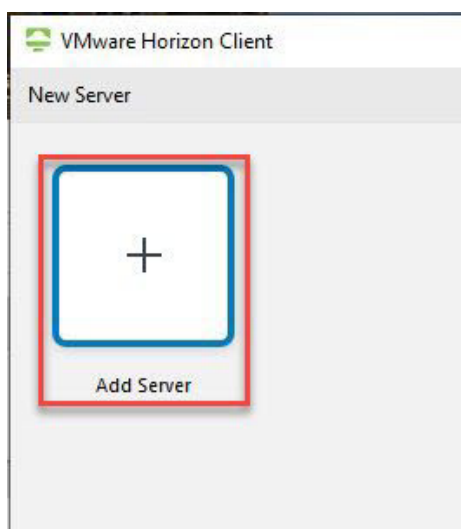

9. If you are going to use a Flash drive to save data when working in the VDI machine, insert it in the physical machine now. It needs to be installed on physical device before the Virtual machine starts.

10. Double click **VMware Horizon Client** icon on desktop

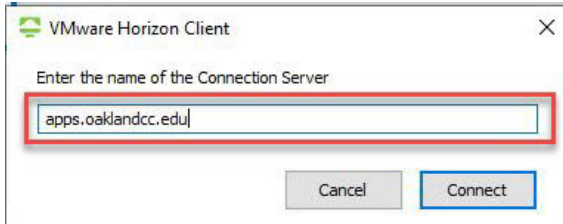

11. Double click **Add Server**

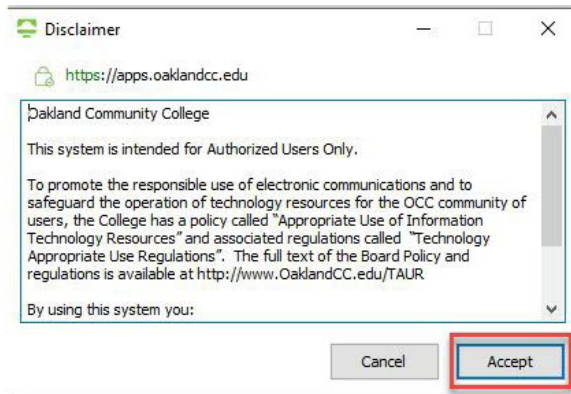

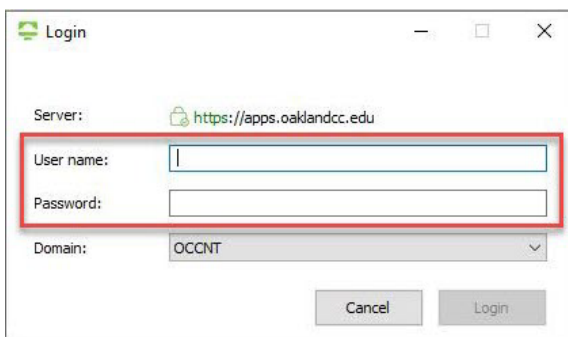

12. Type in **apps.oaklandcc.edu** for the name of the Connection Server  
Click **Connect**

13. Click **Accept**

14. Type in your OCC **User name** and **Password**  
Click **Login**

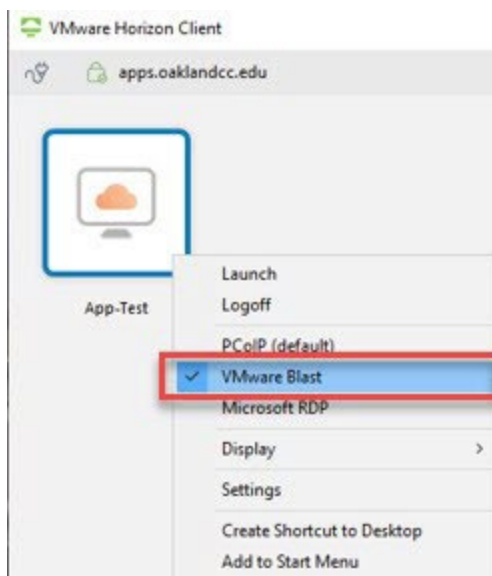

Sample of what the Horizon Client will look like after logon

15. The Horizon Client will show all the VDI machines and applications that you have rights to use – **IMPORTANT!** Need to configure the VDI machine to use VMware Blast Protocol – Right Click on **VDI machine** and Click **VMware Blast** - “App-Test” is a sample yours will be different

16. Double Click **VDI machine** to start the Virtual Machine

**\*Note** - Make sure to insert flash drive into physical machine before starting VDI machine
